### TESTING LABORATORIES INFORMATION

Analysis of 4-Methylcyclohexane Methanol in Water by SERAS SOP# 1857, "*Extraction and Analysis of 4-Methylcyclohexane Methanol in Water by Gas Chromatography/Mass Spectrometry (GC/MS) by Selective Ion Monitoring (SIM)*"

ERT/SERAS Laboratory  
2890 Woodbridge Avenue  
Edison, NJ 08837

All analyses were performed according to our NELAP-approved quality assurance program. The test results meet the requirements of the current NELAP standards, where applicable, except as noted in the laboratory case narrative provided. Results are intended to be considered in their entirety and apply only to those analyzed and reported herein. The ERT/SERAS Laboratory is certified for the analysis of semivolatile organic compounds in water; however, 4-methylcyclohexane methanol is not an accredited compound.

## Introduction

SERAS personnel, in response to WA#SERAS-001, provided analytical support for environmental samples collected from the MCHM Ohio River Site, as described in the following table. The support also included QA/QC, data review and preparation of an analytical report containing analytical and QA/QC results.

The samples analyzed at SERAS were treated with procedures consistent with those specified in SERAS SOP #1008, *Sample Receiving, Handling and Storage* and SERAS SOP# 1009, *Operation of Sample Refrigeration Units*.

Chain of Custody #	Number of Samples	Sampling Date	Date Received	Date Analyzed	Matrix	Analysis/ Method	Laboratory	Data Package
06801	12	01/17/14	01/18/14	01/19/14 & 01/20/14	Water	MCHM/ SERAS SOP# 1857	ERT/SERAS	Z 003

## Case Narrative

Sampling was conducted as per the site-specific Quality Assurance Project Plan (QAPP) and analyzed by the analytical methods as stated in the QAPP. The laboratory reported the data to two significant figures. Any other representation of the data is the responsibility of the user. Data were validated using a Stage 4 validation done manually (S4VM) in accordance with the "Guidance for Labeling Externally Validated Data for Superfund Use." All data validation flags have been inserted into the results tables.

### MCHM in Water Package Z 003

The data package was examined and found to be acceptable.
